ACADEMIC PROJECTS

Project Name: UNumber Calculator

Role: Developer and Tester

Technologies Used: Java

Description: This calculator performs Unit calculations and it is not just limited to normal calculations but also performs operations using units of operands (ex: Kgs to grams and vice versa)

Duration: 1 month (12th Feb 2018 to 10th March 2018)

Project Name: Multi Face Recognition System

Role: Developer and Tester

Technologies Used: Principal Component Analysis, Face recognition software (True key).

Description: This project is built for marking the attendance automatically by detecting the faces of students when they enter the class. We can avoid proxy problems and the lecturers can also concentrate on class without any disturbance. We save the images of the students in a data base and then whenever students enter the class their faces get detected and the images get matched and then the attendance is marked.

Duration: 2 months (2nd February 2016 to 16th April 2016)

EDUCATION
